

MGE Transportes

Since 1991, Progress Rail Services' Brazilian business unit, MGE Transportes, has been a leading railway freight and passenger main service provider and locomotive components manufacturer. As part of the MGE portfolio, the company offers the following capabilities and services: modernization, refurbishment, preventive and corrective maintenance, service of locomotives and passenger cars, start up and overhaul of diesel locomotives, regauge of locomotive trucks, locomotive leasing, used locomotives source, and locomotives specifically revised and adapted for use in Brazil and South America markets.

MGE has been ISO 9000 certified since 2003, and is approved with ISO 9001-2008 requirements. With more than 400 employees, MGE is ready to serve you with its staff of experienced engineers and technicians.

Parent company Progress Rail, a subsidiary of Caterpillar Inc., is a market- leading company for the manufacture and maintenance of traction motors, with the industrial base of this at MGE's facility in Diadema, Brazil. With substantial capacity to provide new and remanufactured traction motors, this facility also is equipped to handle the repair, modernization and maintenance of generators and electric traction equipment and auxiliary components.

MGE's Hortolandia, Brazil location is dedicated to heavy locomotive services, specializing in refurbishment, modernization, regauge of trucks and maintenance of locomotives and passenger cars. In addition to these services, MGE has expanded its capacity with a new plant dedicated to diesel engines, turbo compressors, fuel injection systems, pumps and other diesel engine components.

With the acquisition of EMD in August 2010, the company has significantly broadened its scope and now provides new diesel electric locomotives in Brazil and South America, with the most innovative technology and outstanding performance for their customers.

The company provides engineering services "on site" as appropriate, overhaul and start-up of locomotives and preventive and corrective maintenance of passenger trains in the workshops of the customers, and technical assistance. With its experienced and motivated team, MGE has continues to meet and surpass the expectations of its customers, providing solutions aimed at honoring the needs of each client.
