

FLAT CAR SPECIFICATIONS

NOTES:

1. The hand brake wheel must be below top of the deck.
2. The deck must be welded steel - NO WOOD.
3. The frame must also be of welded steel construction.
4. The deck must be level, no broken springs.
5. The deck has rails installed, they must be 47 1/2 inches (1207 mm) above the top of the rail.
6. If the deck has side flanges, they must accommodate the widest rubber tires.
7. Correcting any discrepancies from any of the above specification will increase the cost of converting the car to add the ramp.
