

Trackwork Division

The Trackwork Division of Progress Rail Services is a leading manufacturer of new special trackwork in North America. We have four production facilities located in DeCoursey, Kentucky; Sherman, Texas; Alorton, Illinois and Winnipeg, Manitoba. Our manufacturing plants are state of the art with CNC machining centers that produce the highest quality specialty trackwork products available in the industry. We design and manufacture trackwork components for the railroad, transit and industrial markets. Whether it is a complete turnout panel or a replacement part, Progress Rail can provide all your trackwork needs. Progress Rail is both ISO 9001-2000 registered and AAR M1003 certified.
